Reasons for Allowance

Claims 1-27 are allowed. Claim 1 is exemplary of the claimed subject matter, all remaining independent, claims being more narrow in scope relating to specific named device. The Italicized features in combination overcome the closest prior art. Applicant is reminded it the unique combination of known parts which overcomes the prior art, not any single limitation.

1. A device comprising: a network processor including a *flow control message* First In First Out (FIFO) buffer and wherein said FIFO buffer includes a parity field and wherein when *said network processor detects a parity error on a read from said FIFO buffer, said network processor corrupts at least one of horizontal parity, vertical parity and Diagonal Interleaved Parity (DIP-2) code.*
